An investment in the sub-fund is meant to produce returns over the long term. You should not expect to obtain short-term gains from such investments.	Fund Summary for ILP.
The securities and instruments in which the sub-fund may invest are subject to market fluctuations and other risks inherent in such investments and there can be no assurance that any appreciation in value will occur. The risk factors may cause you to lose some or all of your investments. A description of the major risks is provided below.	
Market and Credit Risks	
You are exposed to the following risks: Market Risks Prices of the securities held by the sub-fund may go up or down, sometimes rapidly or unpredictably.	
Securities may decline in value due to factors affecting securities markets generally or particular industries.	
Interest Rate Risks The sub-fund's investment in debt securities may be subject to the risk of interest rate fluctuations which may cause the price of debt securities to go up or down. In general, as nominal interest rates rise, the value of fixed income securities is likely to fall.	
<b>Currency Risks</b> Changes in exchange rates between currencies or the conversion from one currency to another may cause the value of a sub-fund's investments to diminish or increase. Currency exchange rates may fluctuate significantly over short periods of time.	
<b>Credit Risks</b> Changes in the financial condition or credit standing of an issuer may negatively affect the underlying fund. An issuer of fixed income securities may suffer adverse changes in its financial condition and unable to pay the principal and/or interest on the instrument	
Liquidity Risks	
You are exposed to liquidity risks. There is no secondary market for the sub-fund. All redemption requests should be made to the Manager.	
Product-Specific Risks	
You are exposed to the following risks: Derivatives Risks The sub-fund may invest in derivatives instruments including futures, options, forwards, swaps or credit derivatives for purposes of hedging and/or efficient portfolio management. Derivatives involve risks different from, and, in some cases, greater than, the risks presented by more traditional securities investments. The usage of derivatives may negatively impact the value of the sub-fund.

ILP	Investment-Linked Policy	
Efficient Portfolio	An investment technique that seeks either to reduce the risk or cost or generate additional return	
Management	consistent with risk profile of the sub-fund.	
Embedded	Embedded derivative is part of a financial instrument that also includes a non-derivative host	
Financial	contract. The embedded derivative requires that some portion of the contract's cash flows be	
Derivative	modified in relation to changes in a variable, such as an interest rate, commodity price, credit rating, or foreign exchange rate.	
Commitment Approach	Commitment approach used in connection with the calculation of global exposure of the sub-fund to derivatives or embedded financial derivative refers to the sum of	
	<ul> <li>a) the absolute value of the exposure of each individual financial derivative not involved in netting or hedging arrangements;</li> </ul>	
	b) the absolute value of the net exposure of each individual financial derivative after netting or hedging arrangements; and	
	c) the sum of the values of cash collateral received pursuant to:	
	i) the reduction of exposure to counterparties of OTC financial derivatives; and	
	ii) efficient portfolio management techniques relating to securities lending and repurchase	
	transactions,	
	and that are reinvested.	
NAV	Net Asset Value	
Offer/Bid Basis	The offer price is the price that is used to purchase units, the bid price is the price that is used when	
	units are sold. The difference in the bid offer price is known as spread. The spread helps to cover	
	distribution costs, marketing and other general administration expenses.	
Business Day	Any day (other than a Saturday, Sunday or gazetted public holiday) on which commercial banks are open for business in Singapore.
