KEY FEATURES OF THE SUB-FUND

WHAT ARE YOU INVESTING IN?

The sub-fund aims to generate capital growth at a sensible risk level for investors who intend to accumulate assets for retirement or other purposes until the year 2045.

The sub-fund is denominated in Singapore Dollars.

The sub-fund is an accumulating fund – the Investment Manager does not intend to make any distribution pay-outs.

For further information, please refer to "Investment Objective, Investment Scope and Fund Details" of the Fund Summary for ILP.

Investment Strategy

The sub-fund intends to achieve its objective by investing directly in a diversified portfolio of asset classes including fixed income, equities and alternatives. The allocation between the asset classes will become more conservative as the portfolio approaches its maturity date, reflecting the need for reduced investment risks and volatility as retirement approaches. It is intended for the assets to be switched into the AIM Now Fund once the portfolio reaches its maturity date for investors to enjoy a steady income and stable capital value after retirement.

For further information, please refer to "Investment Scope and Investment Approach" of the Fund Summary for ILP.

KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>You should consider and satisfy yourself as to the risks of investing in the sub-fund.</p> <p>An investment in the sub-fund is meant to produce returns over the long term. You should not expect to obtain short-term gains from such investments.</p> <p>The securities and instruments in which the sub-fund may invest are subject to market fluctuations and other risks inherent in such investments and there can be no assurance that any appreciation in value will occur.</p> <p>The risk factors may cause you to lose some or all of your investments. A description of the major risks is provided below.</p>	<p>For further information, please refer to “Risks” of the Fund Summary for ILP.</p>
Market and Credit Risks	
<p>You are exposed to the following risks:</p> <p>Market Risks The value of investments by the sub-fund may go up and down due to changing economic, political or market conditions, or due to an issuer’s individual situation.</p> <p>Interest Rate Risks The sub-fund’s investment in debt securities may be subject to the risk of interest rate fluctuations which may cause the price of debt securities to go up or down. In general, as nominal interest rates rise, the value of fixed income securities is likely to fall.</p> <p>Currency Risks Changes in exchange rates between currencies or the conversion from one currency to another may cause the value of a sub-fund’s investments to diminish or increase. Currency exchange rates may fluctuate significantly over short periods of time.</p> <p>Credit Risks Changes in the financial condition or credit standing of an issuer may negatively affect the underlying fund. An issuer of fixed income securities may suffer adverse changes in its financial condition and unable to pay the principal and/or interest on the instrument.</p>	
Liquidity Risks	
<p>You are exposed to liquidity risks.</p> <p>There is no secondary market for the sub-fund. All redemption requests should be made to the Manager.</p>	
Product-Specific Risks	
<p>You are exposed to derivatives risks.</p> <p>Derivative instruments, including futures, options, warrants, forwards, swaps or swap options, may be used from time to time in managing the investments of the sub-fund. The use of derivatives may expose the sub-fund to a higher degree of risk. Derivative contracts can be highly volatile and a relatively small market movement may have a potentially larger impact on derivatives than on standard bonds or equities. Leveraged derivative position can hence increase the sub-fund’s volatility. The sub-fund may sustain loss as a result of the failure of a derivatives counterparty to comply with the term of the derivative contract. The sub-fund may also use derivatives to facilitate more complex efficient portfolio management techniques.</p>

VALUATIONS AND EXITING FROM THIS INVESTMENT

HOW OFTEN ARE VALUATIONS AVAILABLE?

The sub-fund is valued daily on an offer/bid basis. All transactions for ILP are based on forward pricing. The prices are updated on the website of Income on each business day.

HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COSTS IN DOING SO?

You can exit the sub-fund at any time by informing the insurer, either directly or through the financial adviser from whom you purchased the sub-fund.

If you do so within the cancellation period of 14 days from time of purchase, you may do so without incurring the sales charge and fees stated above. However, you will have to take the risk for any price changes in the NAV of the sub-fund since you purchased it.

You will receive the sale proceeds within 7 business days from the time the insurer receives your request to exit from the sub-fund.

Your exit price is determined as follows:

1. If you submit the redemption order before 3 pm on a business day, you will be paid a bid price based on the net asset value of the sub-fund at the close of that business day.
2. If you submit the redemption order after 3 pm, you will be paid a price bid based on the net asset value at the close of the next business day.

The sale proceeds that you will receive will be the exit price multiplied by the number of units sold, less any charges as stated in the terms of the ILP, if applicable.

An example, assuming that redemption charge is not applicable, is as follows:

Exit price	X	Number of units sold	=	Gross Sale Proceeds
S\$1.250	X	1,000	=	S\$1,250
Gross Sale Proceeds	-	Redemption Charge	=	Net Sale Proceeds
S\$1,250	-	S\$0.00	=	S\$1,250

Depending on the ILP that you are investing in, a redemption charge may be applicable. Please refer to the Product Summary of the ILP for more details.

For further information, please refer to "Subscription of Units" and "Redemption of Units" in section 5 and 6 of the Product Summary for ILP.
